

# Virtual Classroom System

(Implementation and testing)

---

## TEAM - DEFAULT

### TEAM MEMBERS

(BSC 2<sup>ND</sup> YEAR, COMPUTER SCIENCE)

*PREETI RACHEL JASPER*

### PROJECT GUIDE

*MRS. MANJULA R*

## Introduction

### **The Idea:**

Developing a virtual classroom system to promote a greater count of students to splurge into the field of Education. It integrates the benefits of a physical classroom with the convenience of a 'no-physical-bar' virtual learning environment, minus the commuting hazards and expenses. It will usher in the immense flexibility and sophistication in the existing learning platform structures, with the perfect blend of synchronous and asynchronous interaction. It provides a means of collaborative learning for the students.

There are basically 4 types of users:

Student

Faculty

College Management (Dean, HODs, Principal)

Administrator

## Purpose

**VCS** (Virtual Classroom System) aims to promote a greater count of students to splurge into the field of Education. It integrates the benefits of a physical classroom with the convenience of a 'no-physical-bar' virtual learning environment, minus the commuting hazards and expenses. It will usher in the immense flexibility and sophistication in the existing learning platform structures, with the perfect blend of synchronous and asynchronous interaction. It provides a means of collaborative learning for the students.

### **Highlighting the main features of VCS :**

Attend Lectures as per student's convenience.

Appear for Exams, view Progress Reports and participate in extra curricular activities online.  
Faculties can evaluate test sheets, schedule tests and perform related activities online.

Providing easy-to-access web based service which can give management an effective means of managing all resources..
